## **DESCRIPTION:**

The goal of this course is to teach architects and designers the fundamentals of large/thin porcelain tiles, from what they are and how they are made to what makes them "green" and examples of their use.

## **LEARNING OBJECTIVES:**

Participants will be able to answer the following questions: What are large/thin porcelain tiles and how are they made? What are the technical characteristics of large/thin porcelain tiles and what are their advantages? What makes large/thin porcelain tiles "green" and a LEED resource? Why are tools, methods of installation and certified installers important in regard to large/thin porcelain tiles? What types of applications are possible for large/thin porcelain tiles?

## **TARGET AUDIENCE**

Architects, specifiers and other design professionals in the industrial/ educational/ commercial market. Ideal audience size 5-25. This program meets every experience level with time designed into the program for questions and answers.
