STONEPEAK PRESENTS

TILE VS. STONE WHAT'S THE BEST PERFORMING FLOORING?

This course provides a comprehensive overview of ceramic tile and natural stone, tracing their historical development and examining the key differences in material types, manufacturing processes, and applications.

Participants will gain an understanding of ANSI, ISO, and ASTM testing standards relevant to tile and natural stone, as well as insights into the sustainable benefits of porcelain tile.

The course also covers essential care and maintenance practices for both materials and explores the most effective applications for porcelain tile in various settings.

LEARNING OBJECTIVES

Learn the differences between natural stone and ceramic tile, such as types of material, manufacturing process, benefits, care & maintenance and applications.

THIS COURSE OFFERS 1 CREDIT HOUR | CREDIT DESIGNATION: HSW

AIA-STONEPEAK | SP0105_v2; IDCEC-STONEPEAK | CC-111332-R2

FORMAT:

Interactive PowerPoint presentation/workshop.

COST:

Free.

FACILITATOR QUALIFICATIONS:

Facilitators are considered experts in the tile industry. They are also trained presenters.
