

STONEPEAK
HIGH TECH PORCELAIN

COLLECTION BROCHURE

The collection

In both the American West and the North African desert, remnants of great trees have survived the elements, exposed to the wind for decades and weathered by the dry, harsh climate.

From the lowlands of Death Valley to the expansive plains of Morocco, these fascinating habitats have given birth to amazingly beautiful natural formations—fired for ages on end in nature's kiln, with daytime temperatures routinely exceeding 120 degrees.

In both coloration and texture, Stonepeak has perfected the look of these rare desert fossils in the Sahara series.
