The Company

For over two decades, Stonepeak has been a trailblazer in the porcelain industry, embodying innovation, sustainability, and unwavering excellence. Our journey began nestled in the hills of Tennessee's Smoky Mountains, where we made it our goal to produce the highest quality, most eco-friendly product on the market.

At Stonepeak, we thrive on pushing boundaries, introducing groundbreaking technology and advancements that elevate our products beyond the ordinary. From cutting-edge designs to sustainable manufacturing practices, innovation is woven into our corporate DNA.

As stewards of the environment, we take immense pride in our commitment to sustainability. Our meticulously crafted high-quality porcelain surfaces aren't merely beautiful; they are also environmentally responsible. We believe in leaving a positive legacy on the planet for generations to come.

While our roots remain firmly planted in Crossville, TN, our influence extends far beyond. Stonepeak serves clients across the nation, gracing homes, commercial spaces and architectural marvels with our exceptional products.

Not long ago, we envisioned a company that would seamlessly unite the finest products with a genuine focus on people. Today, that vision is our reality — a refreshing transformation in the ceramics industry where our commitment to you remains unwavering.

Sustainability

As the U.S. operation of the renowned Iris Ceramica Group, Stonepeak is deeply rooted in a legacy of sustainability. Our journey begins with the visionary founder, Romano Minozzi, who coined the term “Economy = Ecology” in the 1960s. This powerful concept encapsulates his vision of an economy that serves both humanity and the environment we inhabit.

Inheriting this profound philosophy, Stonepeak has always had sustainability woven into its DNA. Our commitment extends beyond mere words; it is reflected in every aspect of our business.

Stonepeak continuously works to create a higher environmental standard, striving to lower its carbon footprint and provide customers with the most ecofriendly porcelain product on the market.

To reduce energy, water, and waste, Stonepeak introduced an innovative formula that utilizes mostly raw materials found in the U.S., with a vast majority being sourced within 250 miles from our manufacturing plant in Crossville, TN. This produces a greener generation of products that is American made.

Our state-of-the-art manufacturing facility also operates with sustainability at its core. Key practices include a nearly closed-loop process, where raw materials and water waste are efficiently recycled back into production. Additionally, our facilities exceed legal requirements, incorporating antipollution devices such as smoke and sand depurators, water purifiers, and reutilization of heat from kilns and production losses. The plant also utilizes eco-conscious packaging and has received accolades from rigorous certifications such as DECLARE, ISO 9001, LEED, EPD, GREEN GOLD, and GREEN SQUARED.

At StonePeak, our commitment to the environment resonates through every solution we create. We firmly believe that sustainable practices not only benefit our planet but also enrich the lives of those who choose our products.

The collection

Mystère is an elevated interpretation of the beloved terrazzo look, capturing the essence of antique grandeur and the effervescent spirit of Venice.

Inspired by the city's rich cultural heritage and vibrant artistic scene, the collection draws its muse from the famed Venetian Carnival — celebrated for its colorful costumes, intricate masks, and opulent masquerade balls. Each surface pays homage to these coveted celebrations, where bold speckles and vivid hues come together to create an elegant, striking, and lively expression of Venetian splendor.

The name “Mystère” derives from the French word “mysterious,” perfectly encapsulating the enigmatic and captivating beauty of this collection. Just as the Venetian Carnival is shrouded in mystery and intrigue, this collection invites you to explore its depths and discover the stories it holds.

With a vast array of colorways including White, Linen, Sand, Light Grey, Dark Grey, Green, Brown, and Blue, each terrazzo-inspired surface infuses a festive exuberance into any design space with its wide range of faces and vibrant aggregate embellishments.

Available in two exquisite finishes — Structured, a high grip solution ideal for outdoor use, and Semi-polished, offering a natural sheen — and offered in three versatile dimensions — 12"x24", 24"x24", 24"x48" and a 4"x24" Bullnose option — these made-in-the-USA porcelain surfaces seamlessly blend durability with the timeless elegance of Venetian artistry

Finishes

Semi-polished

The Semi-polished finish features a moderate sheen, allowing it to reflect light in a remarkably soft way. These qualities, combined with an equally smooth tactile feel, lend itself particularly well-suited for residential floor installations and wall applications across a wide range of environments, including commercial and public spaces.

Structured

The Structured finish features a slightly rough surface that enhances the materiality of the surfaces, lending it a realistic feel. It also stands out for its remarkable anti-slip grip and high resistance to wear. Due to these characteristics, it is particularly suitable for settings requiring significant technical performance, such as high-foot-traffic areas and outdoor spaces.
