

## **Stonepeak Wins Best Product Award at KBIS 2026, Showcasing a Comprehensive Suite of Porcelain Solutions for Kitchen & Bath Environments**

**(Orlando, FL – February 19, 2026)** – Stonepeak Ceramics, the U.S. operation of the Italian Iris Ceramica Group and prominent manufacturer of high-tech porcelain and stoneware solutions, makes its **first-ever debut at the Kitchen & Bath Industry Show (KBIS) 2026**. Exhibiting alongside sister brand **SapienStone**, **Booth #S27209** showcases the collaborative innovations of the Group engineered for today’s most sophisticated kitchen and bath environments, headlined by the award-winning **Kuroca 4D**, honored with the **Best Product Award by BIMsmith**.

This industry recognition marks a major milestone for Stonepeak as it enters the KBIS arena, underscoring the brand’s commitment to elevating the kitchen and bath world with porcelain solutions that unify beauty, innovation, and functional excellence. **Kuroca 4D**, part of Stonepeak’s groundbreaking **4D Porcelain** technology, exemplifies this achievement—delivering full-body depth, expressive veining, and unmatched durability fit for the most luxurious residential environments.

Alongside this celebrated product, Stonepeak features three premier collections—**Dress Code**, **4D Porcelain**, and **Limitless Porcelain®**—each designed to elevate high-end residential spaces with performance-driven beauty.

Representing the pinnacle of the brand’s craftsmanship, these collections demonstrate the versatility of porcelain as a cohesive surface solution for **countertops, vanities, flooring, walls, backsplashes, shower environments, and custom furnishings**. Together, they underscore Stonepeak’s expanding role as a complete material partner for designers, fabricators, and builders seeking durable, luxury-grade solutions for every surface in the home.

“Stonepeak has always believed in pushing the boundaries of what porcelain can be,” said **Hector Narvaez, Executive Vice President**. “Our presence at KBIS 2026 reflects

that commitment, pairing breakthrough technologies with refined design to help professionals build spaces that are both beautifully expressive and built to last.”

## Featured Collections

### Dress Code

Designed by acclaimed interior designer **Jaime Beriestain**, Dress Code is a curated collection that brings couture-level sophistication to porcelain design. Its name reflects its purpose: a material palette that fully “dresses” a space—seamlessly extending across floors, walls, and countertops. Inspired by the classic French **Cabochon** motif found in historic châteaux, the pattern is reimagined with modern scale and dimension. Beriestain approaches ceramic like fabric, weaving a tactile “tweed” of textures enhanced by a graceful **Plissé effect**, resulting in six distinctive products that blend tradition, craftsmanship, and contemporary design.

### 4D Porcelain

4D Porcelain represents a breakthrough in next-generation surface engineering. Developed with advanced full-body technology, each colorway offers authentic, uninterrupted realism—where veining, shading, and pattern flow continuously from surface to edge. This eliminates visual seams, reduces the need for mitering, and delivers the depth and character of natural stone with the performance of engineered porcelain. A testament to Iris Ceramica Group’s ongoing innovation, 4D Porcelain expands the possibilities of luxury applications while staying true to the Group’s vision of re-engineering ceramic materials for modern design.

### Limitless Porcelain®

Limitless Porcelain® redefines the role of porcelain in contemporary architecture. Manufactured in the U.S. in robust **12mm large-format slabs**, this collection transcends traditional boundaries—transitioning effortlessly from indoor and outdoor surfaces to countertops, tabletops, custom furniture, vertical applications, and fully integrated design solutions. Engineered for versatility, durability, and refined aesthetic expression, Limitless Porcelain® empowers architects, designers, builders, and homeowners to create

cohesive, high-performance environments. Its lightweight strength and design-forward appeal make it ideal for both classic installations and bold, bespoke creations.

###

**About Stonepeak Ceramics:**

Stonepeak Ceramics, U.S. operation of Italian parent company Iris Ceramica Group, has been pioneering porcelain flooring solutions since its establishment in 2004. It is the leading domestic manufacturer of high-end ceramics solutions, renowned for its relentless pursuit of innovation, unrivaled product quality, and unwavering commitment to exceptional service. With its headquarters in Chicago, IL, and its manufacturing plant in Crossville, Tennessee, Stonepeak leads the industry, taking porcelain surfaces to new heights according to the Group's vision: *Re-engineering ceramics to improve the interaction between people and the environment.*
