## The Company

For over two decades, Stonepeak has been a trailblazer in the porcelain industry, embodying innovation, sustainability, and unwavering excellence. Our journey began nestled in the hills of Tennessee's Smoky Mountains, where we made it our goal to produce the highest quality, most eco-friendly product on the market.

At Stonepeak, we thrive on pushing boundaries, introducing groundbreaking technology and advancements that elevate our products beyond the ordinary. From cutting-edge designs to sustainable manufacturing practices, innovation is woven into our corporate DNA.

As stewards of the environment, we take immense pride in our commitment to sustainability. Our meticulously crafted high-quality porcelain surfaces aren't merely beautiful; they are also environmentally responsible. We believe in leaving a positive legacy on the planet for generations to come.

While our roots remain firmly planted in Crossville, TN, our influence extends far beyond. Stonepeak serves clients across the nation, gracing homes, commercial spaces and architectural marvels with our exceptional products.

Not long ago, we envisioned a company that would seamlessly unite the finest products with a genuine focus on people. Today, that vision is our reality — a refreshing transformation in the ceramics industry where our commitment to you remains unwavering.

# Sustainability

As the U.S. operation of the renowned Iris Ceramica Group, Stonepeak is deeply rooted in a legacy of sustainability. Our journey begins with the visionary founder, Romano Minozzi, who coined the term “Economy = Ecology” in the 1960s. This powerful concept encapsulates his vision of an economy that serves both humanity and the environment we inhabit.

Inheriting this profound philosophy, Stonepeak has always had sustainability woven into its DNA. Our commitment extends beyond mere words; it is reflected in every aspect of our business.

Stonepeak continuously works to create a higher environmental standard, striving to lower its carbon footprint and provide customers with the most ecofriendly porcelain product on the market.

To reduce energy, water, and waste, Stonepeak introduced an innovative formula that utilizes mostly raw materials found in the U.S., with a vast majority being sourced within 250 miles from our manufacturing plant in Crossville, TN. This produces a greener generation of products that is American made.

Our state-of-the-art manufacturing facility also operates with sustainability at its core. Key practices include a nearly closed-loop process, where raw materials and water waste are efficiently recycled back into production. Additionally, our facilities exceed legal requirements, incorporating antipollution devices such as smoke and sand depurators, water purifiers, and reutilization of heat from kilns and production losses. The plant also utilizes eco-conscious packaging and has received accolades from rigorous certifications such as DECLARE, ISO 9001, LEED, EPD, GREEN GOLD, and GREEN SQUARED.

At StonePeak, our commitment to the environment resonates through every solution we create. We firmly believe that sustainable practices not only benefit our planet but also enrich the lives of those who choose our products.

## The collection

Classic Boutique emerges as the newest expression of timeless elegance within Stonepeak's esteemed CLASSIC Collection. Inspired by Italy's rich architectural history, the country's famed grand villas, storied piazzas, and centuries of artisan craftsmanship serve as our muse — reimagining traditional Italian marbles through a contemporary lens.

True to its name, the line blends the familiarity of traditional marble-looks with the refined character of boutique-level design — high-end, curated, and beautifully tailored.

Carrying forward the legacy of the CLASSIC line, Classic Boutique expands the narrative with enhanced graphic precision and remarkable realism. Each 8mm U.S.-made tile captures the intricacies of natural marble—from delicate veining to tonal nuance—reflecting the refined detailing made possible through today's most advanced production technologies. The result is a collection that honors tradition while elevating it, embodying an exceptional level of biomimicry that feels both authentic and aspirational.

The palette spans a curated range of on-trend, marble-inspired hues — from timeless whites and bold blacks to expressive greens and earthy browns—each colorway designed to bring depth and character to any environment. With this thoughtfully balanced spectrum made for effortless mixing and matching, along with a comprehensive selection of formats including 12"x12", 12"x24", 24"x24" and 24"x48", the collection embraces the renewed popularity of checkerboard layouts in modern interiors, honoring old-world luxury while aligning with today's design movements. Completing the offering, special trim pieces include a 3"x24" bullnose, 2"x2" mosaic, 9"x14" basketweave mosaic, and a notable new addition to our portfolio: an arch mosaic.
