The Company

For over two decades, Stonepeak has been a trailblazer in the porcelain industry, embodying innovation, sustainability, and unwavering excellence. Our journey began nestled in the hills of Tennessee's Smoky Mountains, where we made it our goal to produce the highest quality, most eco-friendly product on the market.

At Stonepeak, we thrive on pushing boundaries, introducing groundbreaking technology and advancements that elevate our products beyond the ordinary. From cutting-edge designs to sustainable manufacturing practices, innovation is woven into our corporate DNA.

As stewards of the environment, we take immense pride in our commitment to sustainability. Our meticulously crafted high-quality porcelain surfaces aren't merely beautiful; they are also environmentally responsible. We believe in leaving a positive legacy on the planet for generations to come.

While our roots remain firmly planted in Crossville, TN, our influence extends far beyond. Stonepeak serves clients across the nation, gracing homes, commercial spaces and architectural marvels with our exceptional products.

Not long ago, we envisioned a company that would seamlessly unite the finest products with a genuine focus on people. Today, that vision is our reality — a refreshing transformation in the ceramics industry where our commitment to you remains unwavering.

Sustainability

As the U.S. operation of the renowned Iris Ceramica Group, Stonepeak is deeply rooted in a legacy of sustainability. Our journey begins with the visionary founder, Romano Minozzi, who coined the term “Economy = Ecology” in the 1960s. This powerful concept encapsulates his vision of an economy that serves both humanity and the environment we inhabit.

Inheriting this profound philosophy, Stonepeak has always had sustainability woven into its DNA. Our commitment extends beyond mere words; it is reflected in every aspect of our business.

Stonepeak continuously works to create a higher environmental standard, striving to lower its carbon footprint and provide customers with the most ecofriendly porcelain product on the market.

To reduce energy, water, and waste, Stonepeak introduced an innovative formula that utilizes mostly raw materials found in the U.S., with a vast majority being sourced within 250 miles from our manufacturing plant in Crossville, TN. This produces a greener generation of products that is American made.

Our state-of-the-art manufacturing facility also operates with sustainability at its core. Key practices include a nearly closed-loop process, where raw materials and water waste are efficiently recycled back into production. Additionally, our facilities exceed legal requirements, incorporating antipollution devices such as smoke and sand depurators, water purifiers, and reutilization of heat from kilns and production losses. The plant also utilizes eco-conscious packaging and has received accolades from rigorous certifications such as DECLARE, ISO 9001, LEED, EPD, GREEN GOLD, and GREEN SQUARED.

At StonePeak, our commitment to the environment resonates through every solution we create. We firmly believe that sustainable practices not only benefit our planet but also enrich the lives of those who choose our products.

The collection

EarthForm is a contemporary stone-look collection that channels the quiet strength, depth, and poetry of the natural world. Crafted with a refined aesthetic, a focus on material authenticity, and the advanced Full Body³ technology, it offers a modern interpretation of earth-derived beauty with unmatched depth and integrity.

The collection celebrates geological formations shaped over centuries, embracing the raw elegance found within the earth itself. With the impressive Full Body³ technology, EarthForm utilizes actual raw materials, mineral flakes, and granules throughout the entire body, resulting in a surface where veining, texture, and chromatic variations run through the full thickness of the material, echoing the way real stone forms in layers over time. By merging artisanal tradition with a technologically advanced, sustainable production method, this collection achieves a visual and structural continuity that feels genuinely geological—timeless, authentic, and deeply rooted in nature.

The name EarthForm reflects this origin story. Each tile draws from the formations carved by time: layers, fragments, and organic patterns that tell a story of emergence. It is a material shaped not by trends, but by the earth's own quiet artistry.

The collection spans 10 colors, moving from grounded neutrals — beige, brown, grey, and black — to richer earth-inspired hues such as tonal blues and dusty red, offering a full chromatic landscape for architectural expression. EarthForm is available in 48"×48", 24"×48", and 24"×24" formats, along with coordinating pieces including a 2.6"×24" bullnose and a 12"×12" mosaic. The series is produced in a 10mm thickness and features a range of finishes tailored to different applications—including antislip for outdoor environments; natural plus, an elevated DCOF slip resistance for high-traffic commercial spaces; structured, a decorative, sculptural texture that creates shifting plays of light and shadow for visual depth; and top lapped, a smooth-to-the-touch surface with a soft, refined tactility that enhances interior spaces with subtle sophistication.
